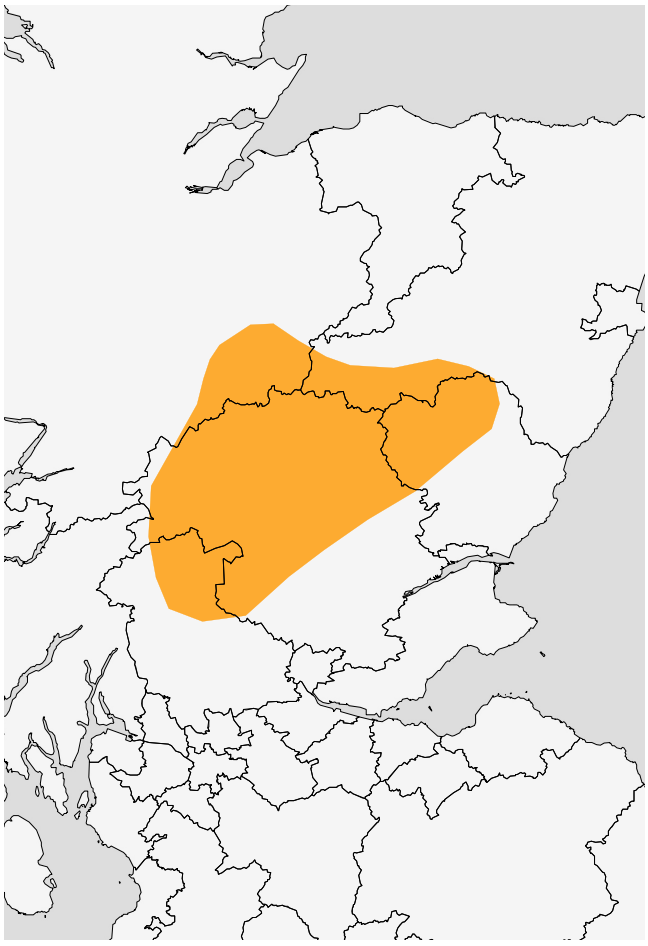
Amber warning
Snow & Ice

Between
07:00 Sat 23 Nov 2024 and
17:00 Sat 23 Nov 2024



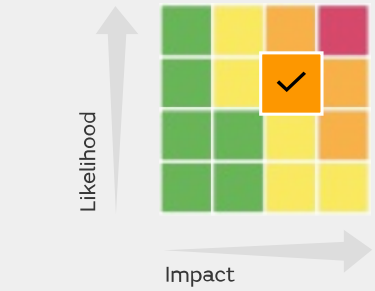
Storm Bert will bring a spell of heavy snow, leading to some disruption on Saturday

What to expect

- Travel delays on roads are likely, stranding some vehicles and passengers
- Some delays and cancellations to rail travel are likely
- There is a good chance that some rural communities could become cut off
- Power cuts are likely and other services, such as mobile phone coverage, may be affected
- Injuries from slips and falls are likely on icy surfaces
- Untreated pavements and cycle paths likely to be impassable

Further details

Heavy snow will spread northeastwards on Saturday morning, giving significant accumulations in many areas. Accumulations of 10-20 cm are likely on ground typically above 200m, with potentially as much as 20-40 cm on hills above 400m. Snow will eventually revert to rain during Saturday afternoon, but may be preceded by a short spell of freezing rain in places adding to the ice risk. Strengthening winds will lead to drifting of lying snow, with difficult travelling conditions likely on higher level routes, and the risk of interruptions to power supplies.



Medium likelihood of medium impacts

Snow & Ice

Between
07:00 Sat 23 Nov 2024 and
17:00 Sat 23 Nov 2024

Further Details (continued)

A fairly rapid thaw of lying snow is then likely on Saturday night as milder air moves in.

What should I do?

It is safer not to drive in these conditions, but if you need to make an essential journey, consider alternative forms of transport, to keep you and others safe. If you must drive, do this more safely by: using dipped headlights; accelerating gently, using low revs and changing to higher gears as quickly as possible; starting in second gear to help with wheel slip; maintaining a safe and steady speed, keeping distance from other vehicles; using a low gear to go downhill, avoiding braking unless necessary; steering into skids, not taking your hands of the wheel, and avoiding slamming on brakes.

People cope better with power cuts when they have prepared for them in advance. It's easy to do; consider gathering torches and batteries, a mobile phone power pack and other essential items.

If isolated due to snow, follow these simple steps to keep safe and well: keep the thermostat set to the same temperature both during the day and at night; turn off electrical heaters and put out your fire before going to bed; ensure pets are safe by keeping them warm and comfortable; prevent frozen pipes by opening kitchen and bathroom cabinet doors to allow warmer air to circulate around the plumbing; stay indoors, wrap up warm and close internal doors to keep the heat in; and, if you need support call the British Red Cross Support Line on 0808 196 3651.

Help to protect vulnerable people that you know including older people, those with underlying conditions and those who live alone; they may need support with food and medical supplies. If you are worried about your health or that of somebody you know, ring NHS 111 (or consult NI:DIRECT if in Northern Ireland).

Stay up to date with the weather forecast for your area and follow advice from emergency services and local authorities.
